**RE: Homestake Mining Company's (Homestake) Water Use Report Letter of
Information No. 710 for June 2020**

Dear Mr. Burrus,

This information is relative to files 1605 and B-28 for June 2020.

On June 29, 2020 the meter readings for Deep Well #1 (B-28-S), Deep Well #2 (B-28-S-1) and well 951R (B-28-POD1340) were 541,737,984, 810,211,000 and 849,071,000 gallons, respectively. 951R usage was for fresh water usage on the relining of the West Collection Pond. Monthly meter readings and volumes of water usage are presented in Table 2.

Metered gallons of 23,750,500 [total water injected] or 72.9 acre-feet (see next to last column in Table 1) were injected into wells in the San Mateo alluvial aquifer and the Upper and Middle Chinle aquifers, all located in Sections 26, 27, 28, 34 and 35 T12N, R10W and Section 3 T11N, R10W. As stated in Permit No. 1605 and B-28 Temp, Homestake requests return flow credits for water that is returned to underground aquifers. A portion of this injected water was shallow aquifer water treated by reverse osmosis and zeolite.

A monthly total of [industrial diversion] 26,882,636 metered gallons or 82.5 acre-feet (see tenth column in Table 1) of water were pumped from Homestake's production wells, of which 23,750,500 metered gallons [total water injected], were returned to the Bluewater underground water basin. Metered water used for industrial purposes was [industrial consumption] 3,132,136 gallons or 9.6 acre feet for June.

Thank you very much for your time and attention, if you have any questions regarding the foregoing information, I can be reached at 505-238-9701.

Respectfully,

David W. Pierce
Closure Manager
